
Technical information

Concrete Chemical

Constriction Additives

Rockconcer SA-123 is a raw material for producing og air-entraining agent in concrete admixture and construction chemical.

Properties:

Appearance: Yellow liquid

Nature: Quaternary Ammonium compounds

Ionity: Anionic

pH (1:10 solution): 7 ± 0.5

Chloride content (ppm): Max. 200

Solubility: Soluble in water

Shelf life: Up to one year in closed area

Packing: 50 – 200 Kg's Drums

Rockconcer SA-123

Applications & Recommendation

Rockconcer SA-123 is the international creation of tiny air bubbles in concrete. The bubbles are introduced into the concrete by the addition to the mix of an air entraining agent to increase workability and strength against air condition.

NOTE: According to our best knowledge and technical experiments, the above data is true and accurate. Regarding to variety of consumption procedures, it is recommended to evaluate the information before use.
