
Technical information

Retanning

Syntans & Auxiliaries

Basic chromium sulphate has a high tanning power. It is a drum dried powder in green color which is easily soluble in cold water and very soluble in hot water. It contains less than 10 ppm hexavalent chrome.

Properties:

Appearance: Green powder

Nature: Basic chromium sulphate

Basicity %: 33 – 35

Ionity: Anionic (electrolyte stable)

Cr₂CO₃ %: 25 ± 1

Safety: According to our best experience, it hasn't any harmful effect on health.

Storage Conditions: Store in a cool, dry, well-ventilated area (15-25°C), out of direct sunlight.

Packing : 25 Kg PE bags

Basic Chrome Sulphate

Applications & Recommendation

Basic chromium sulphate can be used in tanning and retanning of any kind of leather including hides or skins. Due to its properties, Our product meets all requirements of a good leather tanning of any kinds. Uniformity and evenness of color and tanning effect is one of the plus points of this product which is suitable for dyeing to any shade. Leather made with this product is fine in grain and has a good compactness. It is compatible with other standard products used together with this product.

NOTE: According to our best knowledge and technical experiments, the above data is true and accurate. Regarding to variety of consumption procedures, it is recommended to evaluate the information before use.
