Deliming Agent

Rockaltal F is a special deliming agent which can be used single for deliming stage in any type of leather, in the drum, paddle or pit. Rockaltal F delimes the pelt layer by layer.

Rockaltal F produces easily soluble calcium salts and is able to dissolve any lime blast which already present. It can be used in short float processes. Pelt delimed with Rockaltal F exhibits a clean and flat grain with good tightness.

Properties:

Appearance: White powder

Nature: Combination of low molecular acids and organic and inorganic compounds

Solid %: 93 - 95

pH(1:10 solution): 5 ± 1

Packing: 50 Kg's PE bags

Storage Conditions: Store in a cool, dry, well-ventilated area (15-25°C), out of direct sunlight.

Safety: According to our best experience, it hasn't any harmful effect on health. For more information refer to MSDS

No. 47, South Iranshahr,

Rockaltal F

H.S Code:3202.90

Applications & Recommendation

To protect the hides and skins, the necessary amount of the product should be added in 2 or 3 installments. After the required degree of deliming, bating can follow in the same float.

The recommendation for use is :

1.0-1.5% (Pelt wt.) Cow

0.5-1.0% (" ") Sheep

1.0-1.5% (" ") Goat

Recipe

After liming and fleshing

300% Water 25°C 15' drain

300% Water 30°C 15' drain

100% Water 30°C

0.1% Rockol 642

0.5% Rockaltal F 30'

+50% Water 40 °C

X% Rockaltal F 30-60'

Bating and usual processes

NOTE: According to our best knowledge and technical experiments, the above data is true and accurate. Regarding to variety of consumption procedures, it is recommended to evaluate the information before use.
