

ROCKYTAN RPAK

Rockytan RPAK is a light fast, anionic retanning material in powder form with a pronounced neutralizing and buffering effect and excellent dyeing properties.

Properties:

Appearance	: White powder
Nature	: Organic and inorganic compounds
Concentration	: Approx 98%
PH	: 3,4
Packing	: 25 Kg bags
Safety	: Refer to MSDS

Applications & Recommendation

Rockytan RPAK has very good neutralizing capacity. It has excellent light fastness.

Rockytan RPAK can be used single in neutralization process. It is used as neutralizing tanning and retanning materials for aniline, Nubuck, suede and other types of leather where full colors, brilliance, levelness, light fastness and heat resistance are desired. Its better application occurs when used between Sodium formate and bicarbonate about 0.1-0.7% for 30-45'.

Note : Due to its buffery effect, when used in neutralization, the PH doesn't exceed 7-7.5 even by adding powerful alkalies like caustic soda.

NOTE: According to our best knowledge and technical experiments, the above data is true and accurate. Regarding to variety of consumption procedures, it is recommended to evaluate the information before use.
