

Technical information

Retanning

Syntans & Auxiliaries

Rockytan ROS is a general purpose replacement syntan for the retannage of chrome leather containing formaldehyde and for vegetable tannage.

Properties

Appearance: Beige Powder

Ionity: Anionic

pH (1:10 solution): 3.5 ± 0.5

Nature: Phenolic replacement syntan

Storage Conditions: Store in a cool, dry, well-ventilated area (15-25°C), out of direct sunlight.

Safety : According to our best experience, it hasn't any harmful effect on health.for more information refer to MSDS

Packing: 25 Kg's PE bags

Rockytan ROS

Applications & Recommendation

Rockytan ROS can be diluted in cold and warm water, also suitable for all types of leather. Rockytan ROS gives almost a white leather with a medium firm handle. As it has low astringency the fine pattern of grain is preserved.

Rockytan ROS imparts a soft handle to leather and in combination with vegetable tannins, it brightens the color of leather.

It has a good levelling effect on dyes. Leather retanned with Rockytan ROS show a good buffing and embossing properties. Its better filling effect takes place when used in combination with resin tanning materials like Rockytan RR7.

Our recommendation for use is about 1-4% in retannage of any leather and up to 10% in vegetable tanning.

NOTE: According to our best knowledge and technical experiments, the above data is true and accurate. Regarding to variety of consumption procedures, it is recommended to evaluate the information before use.
