

Rockytan RE-600

Rockytan RE-600 is a copolymer retanning agent based on acrylic monomers. It plays a very important role in filling of the loose bellies. Rockytan RE-600 helps to improve buffing characteristic on suede leathers also.

Properties

Appearance: Clear liquid

Nature: Acrylic

Activity %: 40 ~ 43

Moisture %: 60 ± 1

Ionity: Anionic

pH (1:10 solution): 7.5 ~ 8.5

Safety: According to our best experience, it hasn't any harmful effect on health. for more information refer to MSDS

Storage Conditions: Store in a cool, dry, (15-25°C), out of direct sunlight.

Packing: 100,200 Kg's PE open mouth drums

Applications & Recommendation

Rockytan RE-600 makes leather, very soft and full fill.

Rockytan RE-600 is a very good retanning agent for all types of leather. It has also a good light fastness property in white crust. Before retanning, the leathers must be neutralized well.

The dosage of consumption depends on the type of leather and varies between 1-4% (based on the shaved weight).

After Neutralization:

80% Water 35 °C

X% Dye 45-60'

1-4% Rockytan RE-600 30'

+ Other retanning agents

Or after fatliquoring:

1-2% Rockytan RE-600 30'

NOTE: According to our best knowledge and technical experiments, the above data is true and accurate. Regarding to variety of consumption procedures, it is recommended to evaluate the information before use.
