

# THE BIGGEST LEATHER CHEMICAL MANUFACTURER IN MIDDLE EAST

# STARTED:

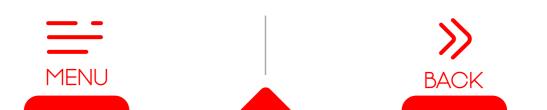

ROCK CHEMIE Industrial Group is a producer of specific chemicals needed for several industries such as Oil and Gas, Petrochemical, Water Treatment, Textile, Leather, Detergent, Cosmetic, Concrete, Mining, pesticides, Steel, and Specialty Defoamers. ROCK CHEMIE was established in 1988 by Dr. M. H. Zehtabchian, who is still the Managing Director and the Chairman of the Board, as a private joint-stock company and for the time being by the production of around 700 different types of chemicals in various industries.

ROCK CHEMIE Industrial Complex is located in Eshtehard Industrial Zone, (the main and the largest industrial area, at 130km far from Tehran). Through an integrated management system (ISO9001, ISO14001, ISO45001, ISO10002, and ISO10004), certified by Switzerland SGS, company committed to a range of management systems.

Having exported to 68 countries, ROCK CHEMIE is one of the most prominent pioneers in the field of chemicals exporting. ROCK CHEMIE competent R&D and R&I teams, which spread around the world, has made the company as a knowledge-based firm and capable to customize productions and tailor-made accordingly.

# MAIN CHEMICALS SELECT THE DESIRED PRODUCT:

As a hair removal agent for various pelts

Substitution of Formic acid 85%, odorless and colorless, without corrosion effect on human body

free

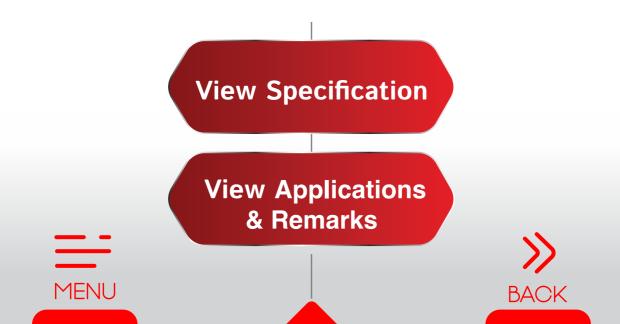

### SODIUM SULPHIDE

**Sodium Sulphide** is a dark yellow, solid flake with a sulfurous smell. It is used in various applications such as Leather tanning, Mining, Pulp and paper industry.

### **SODIUM SULPHIDE**

#### **SPECIFICATION**

Appearance	Dark Yellow Flake
Na <sub>2</sub> S %	60 <u>+</u> 2
Insoluble (ppm)	< 10
Packing	25 Kgs PE bags
Shelf life	12 months

### SODIUM SULPHIDE

**APPLICATIONS & REMARKS** 

Applications are the leather industry (tanning) as a hair removal agent, mining industry (flotation of oxidized and mixed ores: copper, zinc, cobalt, molybdenum, nickel...), pulp and paper industry, metal extraction from aqueous solutions, textile Sulphur dyes) and chemical processing.

1	1

**Nanofix Green** is an Eco-friendly alternative for industrial grade Formic acid 85% which is commonly used in leather industry.

Appearance	Clear Liquid
Odor	Odorless
Color	Colorless
Flammability	Non-flammable
pH (1:10 Solution)	Max 1
Solubility	Soluble in water
Density (gr/cm3)	1.4
Packing	35 Kg's PE Drums & IBC Tank
Shelf life	12 months

MAIN CHEMICALS

#### **APPLICATION & REMARKS**

▶ Nanofix Green is suitable for all kinds of leathers wherever Formic acid 85% is used. It can replace formic 85% in any formulation.

▶ Nanofix Green is exothermal just like any other acids commonly used in tanneries. When water is added, it increases the temperature of the solution during the diluting process.

▶ Nanofix Green (SAFE ACID) should be diluted with water with the portion of 1:10 exactly the same as Formic acid. 10% solution can be safely used to lower the pH during wetting back (re- chroming).

#### **ADVANTAGES**

▶ Non-polluting, eco-friendly and direct replacement for 85% strength Formic acid in any formulations. (No need to change the formulation)

► An additive which imparts more smoothness to the leather surface than formic acid.

Unlike formic acid, this product is not harmful for skin and safe to handle.

▶ Smell of acids does not remain in leathers after the final washing step.

▶ It produces less hydro & Oxy groups thus the leathers will be stronger and darker in dye shades after fixation.

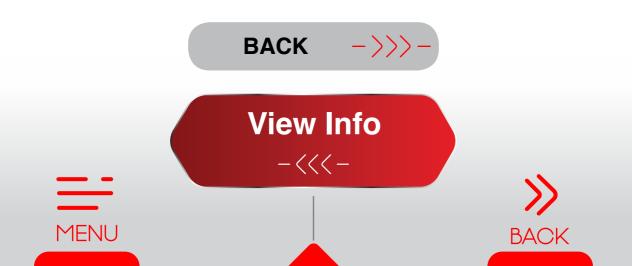

**ADVANTAGES** 

▶ It accelerates acid penetration in the pickling stage. It leads to tighter, fuller and smoother grains in wet-blues after chrome tannage.

► Lower the BOD & COD content in the effluents than Formic acid.

► It does not lead to evaporate any smell of fumes during the dilution, because the product does not contain Sulfuric, Hydrochloric or Formic acids.

This product is NIL (100% free of Formaldehyde)

### **BASIC CHROMIUM SULPHATE**

**Basic Chromium Sulphate** has a high tanning power. It is a drum dried powder in green color which is easily soluble in cold water and very soluble in hot water.

Rock chemie's BCS does not contain hexavalent chrome.

#### MAIN CHEMICALS

### **BASIC CHROMIUM SULPHATE**

#### SPECIFICATION

Appearance	Green Powder
Nature	Basic Chromium Sulphate
Basicity, %	33 – 35
Ionity	Anionic (electrolyte stable)
Cr2CO3, %:	25 ± 1
Packing	25 KG PE bags
Shelf life	24 months

#### MAIN CHEMICALS

### **BASIC CHROMIUM SULPHATE**

**APPLICATION & REMARKS** 

**Basic Chromium Sulphate** can be used in tanning and retanning of any kind of leather including hides or skins. Due to its properties, our product meets all requirements of a good leather tanning of any kinds. Leather made with this product is fine in grain and has a good compactness. It is compatible with other standard products used together with this product.

# LIMING AND DELIMING AGENT SELECT THE DESIRED PRODUCT:

An anti-creasing agent

Epizodel X2

02

Deliming agent which is a combination of Sodium acetate, sodium metabisulfite and common salt

### **ROCKALTAL RMB**

**Rockaltal RMB** is a liming auxiliary which can be used instead of Sodium Sulphide and the advantage is that it does not discharge any harmful Sulphide ion in effluent. Also, it makes the pelt cleaner with opening the surfaces and tighter grains.

### **ROCKALTAL RMB**

**SPECIFICATION** 

Appearance	Clear colorless liquid
Nature	Mixture of organic compounds
Solubility	Soluble – Uniform
Solid Content, %	27-29
pH (1:10 Solution)	10.5 <u>+</u> 0.5
Density@20° C,gr/cm <sup>3</sup>	1.050 – 1.060
Packing	200 PE Drums
Shelf life	12 Months

**View Info** 

-<<<-

BACK

MENU

### **ROCKALTAL RMB**

**APPLICATIONS & REMARKS** 

If **Rockaltal RMB** being used in the process, clean and fine grains and smooth pelts achieved. Even if **Rockaltal RMB** is used in excess rates, it is oxidized immediately by the oxygen of the atmosphere and no harmful substances goes to the effluent.

### **EPIZODEL X2**

**Epizodel X2** is a special deliming agent which can be used single for deliming stage in any type of leather, in the drum, paddle or pit.

Pelt delimed with **Epizodel X2** exhibits a clean and flat grain with good tightness.

### **EPIZODEL X2**

#### **SPECIFICATION**

Appearance	White free-floating powder
Nature	Combination of low molecular acids and organic and inorganic compounds
Solid Content, %	97-98
pH (1:10 Solution)	5-6
Solubility	Soluble into water
Density (gr/cm3)	0.9-1
Packing	25 Kg's PE Bag
Shelf life	24 months

### **EPIZODEL X2**

**APPLICATIONS & REMARKS** 

To protect the hides and skins, the necessary amount of the product should be added in 2 or 3 installments. After the required degree of deliming, bating can follow in the same float. Containing Sodium metabisulfite in this substance causes two important properties for this substance which following:

Bleaching wet blue pickled and neutralizing H2S gas. Using 0.5% or 1% of this product has two results. First of all, will give you a bleach, soft and smooth pickled with a good touch. The more important matter, this production will neutralize H2S gas which probably create and appear during the processing in the paddle, because many of the tanners mix various kinds of productions and may this thing will create.

MENL

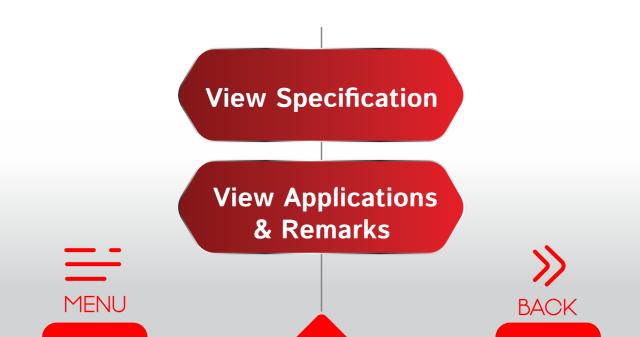

### **ROCKALTAL F**

**Rockaltal F** is a special deliming agent which can be used singly for deliming stage in any type of leather, in drum, paddle or pit.

**Rockaltal F** delimes the pelt layer by layer and produces easily soluble calcium salts and is able to dissolve any lime blast which is already existing. It can also be used in short float processes. Pelts delimed with **Rockaltal F** have a clean and flat grain with good tightness.

### **ROCKALTAL F**

#### SPECIFICATION

Appearance	White Powder
Nature	Combination of low molecular acids & organic & inorganic compounds
Density (gr/cm3)	0.9-1
Solid Content, %	97-98
pH (1:10 Solution)	5-6
Packing	25 Kg's PE Bags
Shelf life	24 months

### **ROCKALTAL F**

**APPLICATIONS & REMARKS** 

To protect the hides and skins, the necessary amount of **Rockaltal F** should be added in 2 or 3 portions. After the required degree for deliming, bating can follow in the same float.

#### RECIPE:

1.0-1.5% (Pelt wt.) Cow 0.5-1.0% (Pelt wt.) Sheep 1.0-1.5% (Pelt wt.) Goat

After liming and fleshing 300% Water 25°C 15 min drain 300% Water 30°C 15 min drain 100% Water 30°C 0.1% Rockol 642 0.5% Rockaltal F 30 min +50% Water 40°C X% Rockaltal F 30-60 min Bating and usual processes.

ENZYMES SELECT THE DESIRED PRODUCT:

Rockenzyme WS-20

An alkaline enzymatic soaking auxiliary for green and salted raw skins Rockenzyme 7500-L

02

A protease alkaline bating agent with 1500 LVU, including salt and ammonium buffers

It is a protease and other enzymes mixture to expand the area of the crust

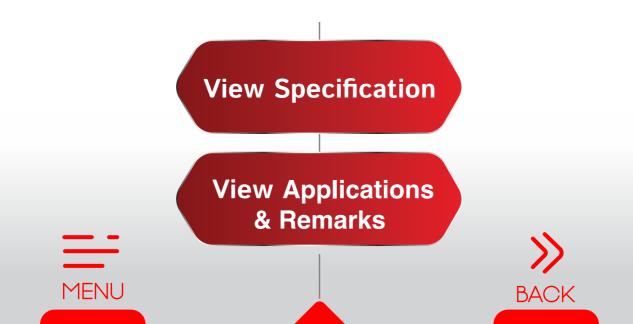

# **ROCKENZYME WS-20**

**Rockenzyme WS-20** is an enzymatic soaking auxiliary for green and salted raw stock.

3

#### **ROCKENZYME WS-20**

#### **SPECIFICATION**

Appearance	White powder
Nature	Pancreatic mixture
Solid Content, %	Min 97
pH (1:10 Solution)	11-12
Solubility	Non-soluble
Density (gr/cm3)	0.7-0.8
Packing	25 Kg's PE Bags
Shelf life	24 months

### **ROCKENZYME WS-20**

**APPLICATIONS & REMARKS** 

**Rockenzyme WS-20** is added undissolved to the soaking process. Caustic soda or Soda ash can be used to adjust the pH value. The chosen substance should be dosed in such way that the initial pH value of the liquor is 10.0 - 10.5 and the final value pH 9.0 –9.5.

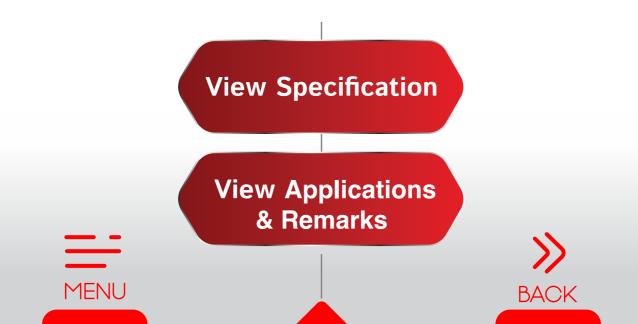

### **ROCKENZYME 7500-L**

**Rockenzyme 7500-L** is a protease alkaline bating agent which contains ammonium salts and buffers. **Rockenzyme 7500-L** is suitable for all kinds of pelts. By applying **Rockenzyme 7500-L** the grain clarity and smoothness will be improved and all excess proteins will be dissolved and removed from the hides and skins.

### **ROCKENZYME 7500-L**

#### **SPECIFICATION**

Appearance	Cream Powder
Nature	Protease Alkaline Enzyme
Solid Content, %	Min 97
pH (1:10 Solution)	7-8
Activity, %	1500 LVU
Solubility	Non-Soluble
Density (gr/cm3)	0.8 - 0.9
Packing	25 Kg's PE Bags
Shelf life	24 months

**View Info** 

- <<< -

MENU

### **ROCKENZYME 7500-L**

#### **APPLICATIONS & REMARKS**

**Rockenzyme 7500-L** is very effective at temperature of 33 - 37°C and pH Value 8.3. Used quantity is different based on the type of pelt and degree of required effect.

#### The recommendation for use is:

0.5-1.0% (Pelt wt.) Cow 0.4-0.6% (Pelt wt.) Sheep 0.4-1.3% (Pelt wt.) Goat 1.5-2.0% (Pelt wt.) Buffalo

#### After liming, fleshing and deliming:

100% Water 37°C 0.1% Rockol 642 X% **Rockenzyme 7500-L** 30-60 min drain

Check bating process & Drain 300% Water 25°C 15 min drain 300% Water 20°C 15 min drain

bating agent with anti-wrinkling effect. **Rockenzyme ANWA** is a bacterial protease produced by submerged fermentation of a Bacillus Sp. strain especially suitable for wet blue re-bating.

**Rockenzyme ANWA** is an enzyme-based bating agent with an optimum efficiency at a pH range of 3-5.5. it can be used up to temperatures of 55 °C. Its dosage should be around 0.3 - 0.5% of hide and skin weight. In all cases, it is suggested that **Rockenzyme ANWA** should be evaluated in small scale before going full stream in order to detect its best dosage in the process.

### **ROCKENZYME ANWA**

#### **SPECIFICATION**

Appearance	Cream powder
Nature	Bacterial Protease
Solid Content, %	Min 97
pH (1:10 Solution)	7-8
Solubility	Soluble into water
Density (gr/cm3)	0.55 - 0.65
Packing	25 Kg's PE Bags
Shelf life	24 months

### **ROCKENZYME ANWA**

**APPLICATIONS & REMARKS** 

Wet blue can be treated with **Rockenzyme ANWA** to level out the differences of the raw material and to improve the evenness and shade intensification of the dyeing. Also, when our wet blue needs extra bating, it is getable by this agent.

An acidic bate with **Rockenzyme ANWA** is particularly recommended for wet blue showing a very compact and irregular fiber structure such as calf or goat skins.

It improves the evenness of the leather due to a better opening up of the fibers. Using of **Rockenzyme ANWA** often expands the cuttable area (yield area) to the normally loose belly area.

General recommendations for the use of **Rockenzyme ANWA**:

**Pickled sheepskins:** Percentages are based on pickled weight:

#### Bate:

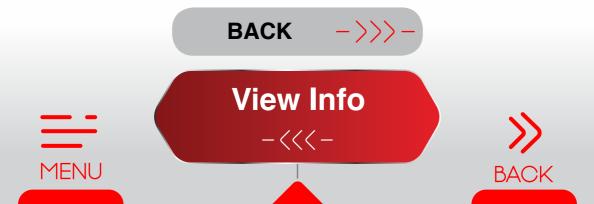

150% Water 40°C

#### 0.5% Rockenzyme ANWA

Overnight on automatic Drain float Further processing as usual pH = 3.5-4

#### Wet blue calf skins or hides: Percentages are based on shaved weight:

After rechroming as usual **Neutralization:** 150% Water 35 °C 2% Sodium Formate 1-1.5% Neutralization Syntan 60' 0.5-1% Sodium Bicarbonate 3×15' pH = 5.5 0.5% **Rockenzyme ANWA** 90' Drain and washing Further processing as usual

## **ROCKENZYME ANWA**

#### **ADVANTAGES**

► Anti-wrinkling properties for both pickled hides and skins and wet blues.

▶ Remove the fold marks in pickled skins and wet blues.

- ▶ Noticeably increase the tear strength.
- Improve the smoothness and softness of grain.
- ▶ Increase the shade intensification of the dying.
- ▶ Increase the yield area (between 3-5%).

#### **DEGREASING AGENT**

# SELECT THE DESIRED PRODUCT:

01 An eco-friendly nonionic degreasing agent for beamhouse and retannage processes **Rockol DGS-100** 

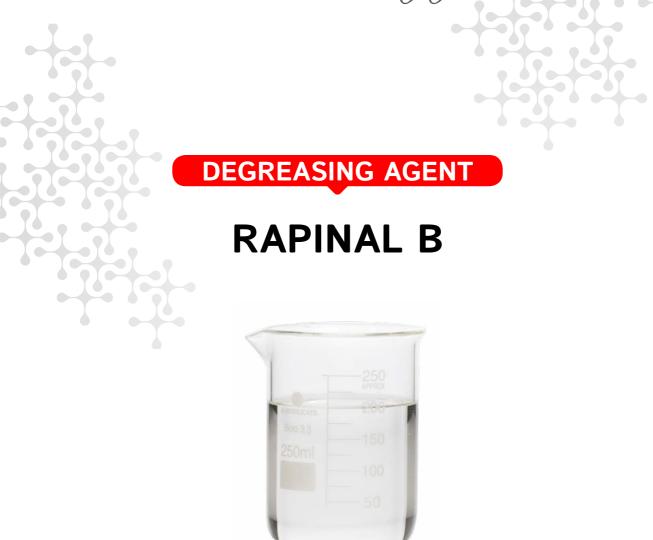

02

A solvent-based degreasing agent with the advantage of proper water solubility in beamhouse process

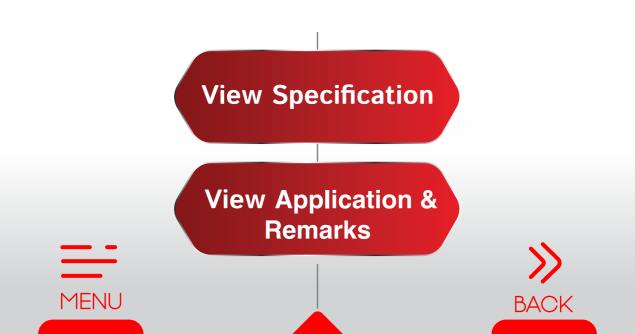

**Rapinal B** is a powerful nonionic degreasing agent suitable for all kinds of hides and skins. It also can be used during the soaking, liming, deliming and bating processes to accelerate them and giving cleaner, smoother and more uniform pelts.

#### DEGREASING AGENT

250

200

### **RAPINAL B**

Appearance	Clear viscous liquid
Nature	Polyoxy ethylene oxide
Solid Content, %	27-29
pH (1:10 Solution)	7-8
Solubility	Soluble into water
Viscosity cP @ 25 °C,	400 - 600
Packing	PE Drums
Shelf life	12 months

# **RAPINAL B**

**APPLICATIONS & REMARKS** 

**Rapinal B** has outstanding emulsifying and power for fats, fatty acids and dirt of all kinds. It brings about more even distribution of fats and facilitates penetration of the chemicals. It can be used in alkaline and acid pH range. It dissolves equally well and quickly in both cold and warm water.

**Rapinal B** is free of alkyphenol (AP) and alkyphenol ethoxylates (APEO) and biodegradable.

#### Our recommendation for use:

Sheep pelts: 3-4% (based on weight)

#### without using of solvent:

MENU

Sheep pickled: 2.5-3% (based on pickled weight) without using of solvent.

In soaking, deliming and bating: 0.3 - 0.5%. If solvent is beingused together with the **Rapinal B** for degreasing, the dosage of consumption of **Rapinal B** can be decreased up to 40%.

View Info

- <<< -

BACK

### **ROCKOL DGS-100**

**Rockol DGS-100** is a very strong nonionic solventbased degreasing agent in leather industry. It is mainly used in wet-blue processing. It extracts and emulsifies excess fats and impurities from the skin.

## **ROCKOL DGS-100**

Appearance	Colorless to slightly yellow clear liquid
Nature	Polyethylene ether solvent based
pH (1:10 Solution)	7.5 – 8
Solubility	Soluble in water or inorganic solvents (Milky-Emulsion)
Density (gr/cm3) @ 20°C	0.835 – 0.845
Packing	PE Drums
Shelf life	12 months

#### DEGREASING AGENT

# **ROCKOL DGS-100**

**APPLICATIONS & REMARKS** 

**Rockol DGS-100** degreases the hides/skins by its high penetration effect in all types of pickled and wet-blue processing with a very high degreasing property for removing excess fats and impurities during degreasing and chrome tanning.

Due to the solvent content, it does not need any additional solvents for degreasing. For higher powers it is recommended to combine this product with a nonionic degreasing agent like Rockol 642 up to 1.5%. It is mainly used for high greasy skins like Sheep.

The recommended dosage is: 1.5 - 2.0 % (Pickled wt.) Sheep 0.3 - 0.6 % (Pickled wt.) Goat 0.2 - 0.5 % (Pickled wt.) Cow

#### SOAKING AND WETTING AGENT

# SELECT THE DESIRED PRODUCT:

A anionic soap as a wetting agent, proper for soaking process

A very strong wetting agent with a very high penetration. For wetting the dry and fresh pelts

**Rockol L-251** is an anionic soaking and wetting agent which is used in washing and soaking stages.

## **ROCKOL L-251**

Appearance	Yellowish Clear Liquid
Nature	Alkyl Aryl Sulfonate
Solid Content, %	27-30
pH (1:10 Solution)	6.5 - 7.5
Solubility	Soluble into water
Viscosity cp @ 25°C	300 - 600
Packing	PE Drum
Shelf life	12 months

# **ROCKOL L-251**

**APPLICATIONS & REMARKS** 

**Rockol L-251** is a good washing and wetting agent in soaking stage for all kinds of skins. It can be used as a strong anionic soap to remove all dirt and impurities from the skins during soaking process. As a good emulsifier, it prepares the skins for the next step and after drying, the wool of sheep will be cleaner and brighter than usual process. The dosage of consumption is between 0.3- 0.7% based on raw weight.

### SOAKING & WETTING AGENT

## **ROCKAPON WTO**

**Rockapon WTO** is the most powerful wetting agent, which is easily soluble in water and has a very good penetrating power. It is effective in acids, mild alkalis, neutral media and hard water. It can be used in leather soaking process as a very powerful wetting agent.

### **ROCKAPON WTO**

Appearance	Pale Yellow Clear Liquid
Nature	Sulphited Alcohol Based
pH (1:10 Solution)	6 - 7
Solubility	Soluble in water at any ratio
Density, (gr/cm3) @ 20°C	1.040 – 1.050
Viscosity cp @ 25°C	87
Packing	PE Drums
Shelf life	12 months

# **ROCKAPON WTO**

#### **APPLICATIONS & REMARKS**

Rockol WTO is especially recommended for Soaking of dry & wet salted skins or hides.
Dosage: 0.5 - 1% for wet salted skins or hides.
1 - 2% for dry salted and dry hides or skins.
It is better to use antibacterial products like Negahdar
IST-WB during soaking stage.

### ANTIBACTERIAL

# SELECT THE DESIRED PRODUCT:

A suitable antibacterial agent with phenol derivatives

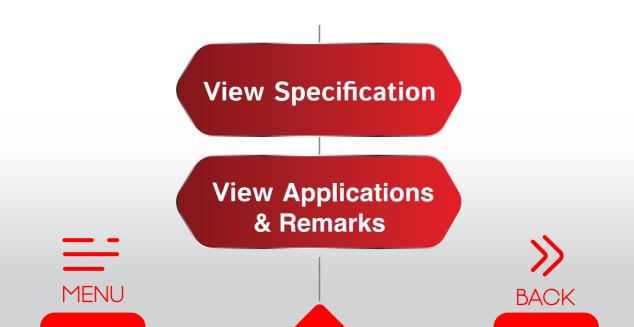

### **NEGAHDAR IST-WB**

**Negahdar IST-WB** is an antibacterial for protection of wet blue against bacteria attack. It is a suitable preservative during soaking, pickling, tanning and etc. **Negahdar IST-WB** is free of PCP and also is a biodegradable product. It It will be destroyed in high alkaline medias and sulfide containing liquors.

### **NEGAHDAR IST-WB**

Appearance	Clear yellow Liquid
Nature	Phenol derivatives (Free from PCP)
pH (1:10 Solution)	7.5 – 8.5
Solubility	Soluble into water
Packing	PE Drum
Shelf life	12 months

## **NEGAHDAR IST-WB**

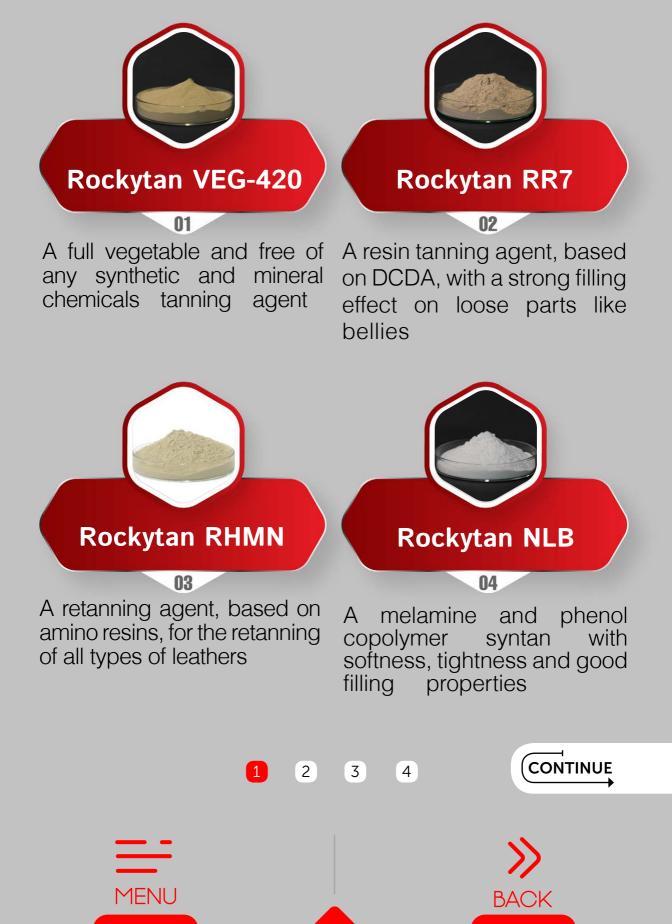

**APPLICATIONS & REMARKS** 

**Negahdar IST-WB** is specially used in the main soaking and retanning process. Degreasing plays a very important role in using this product. It can be used also for raw materials by spraying or mixing with salts and applying.

Our recommendation for use is: Soaking Up to 0.05% based on raw weight

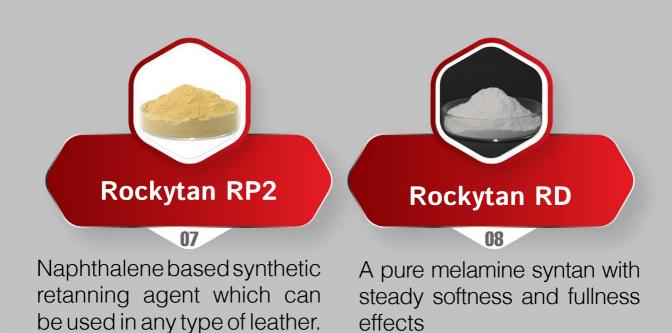

A phenol based syntan for the retannig of chrome and vegetable tannage

05

#### **Rockytan RAB**

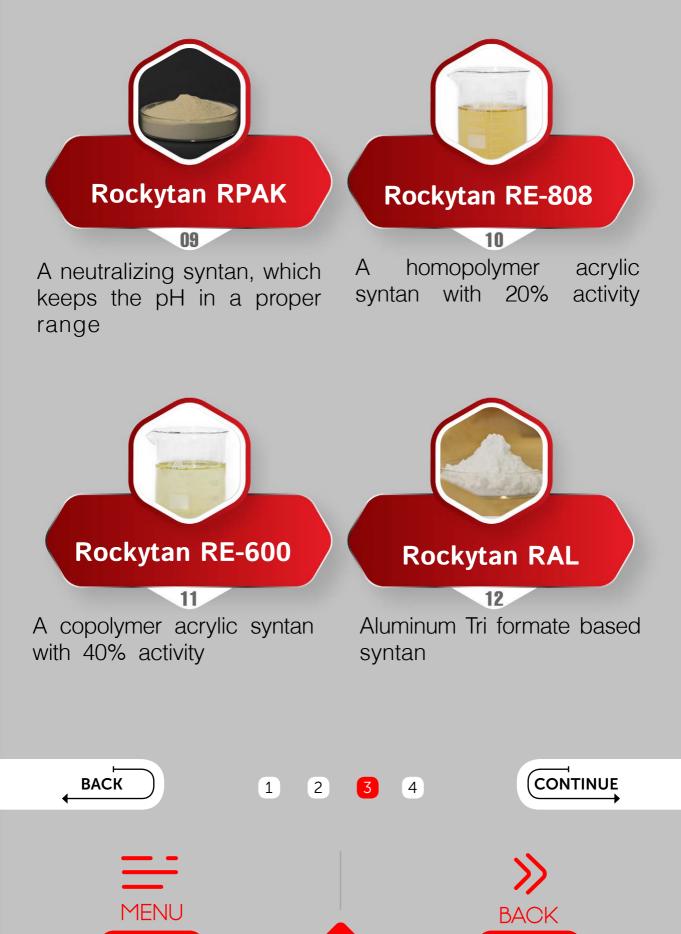

06

A phenolic condensation product, used in any white and soft leathers

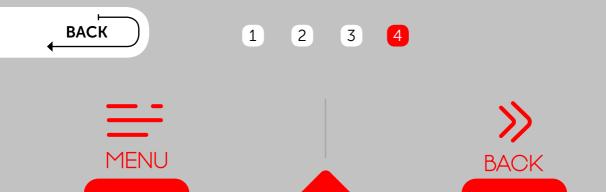

BACK 1 2 3 4 CONTINUE MENU BACK

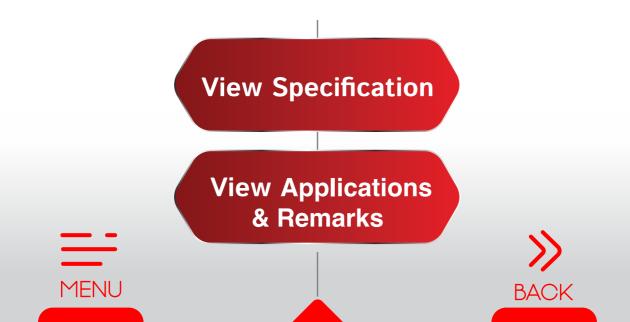

### **ROCKYTAN VEG-420**

**Rockytan VEG-420** is a vegetable tanning agent which has high effects on the tanning of various kind of leather.

C

### **ROCKYTAN VEG-420**

#### **SPECIFICATION**

Appearance	Free floating Beige & Brown Powder (2 colors)
Nature	Extraction of Oak and Root of Trees
Solubility	Soluble into water
pH (1:10 Solution)	8 ± 0.5
Density (gr/cm3) 23 °C	0.4 – 0.6
Packing	25 Kg's Bags
Shelf life	24 months

View Info -<<<MENU
BACK

## **ROCKYTAN VEG-420**

**APPLICATIONS & REMARKS** 

▶ It is fully vegetable based syntan

► It is free of any chemicals or synthetic tanning agent

► It can be used with various kinds of vegetable and non-vegetable tanning and retanning agents

▶ It does not create any bad smell on the crust and made article

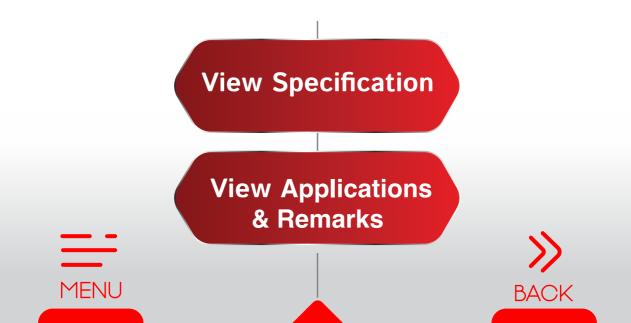

### **ROCKYTAN RR7**

**Rockytan RR7** is a resin tanning agent with a selective filling effect, especially on loose parts like bellies which can be used in any type of leather.

### **ROCKYTAN RR7**

Appearance	Beige Powder
Nature	Resin tanning agent
Ionity	Anionic
pH (1:10 Solution)	8 ± 0.5
Density (gr/cm3)	0.6 – 0.7
Packing	25 Kg's PE Bags
Shelf life	24 months

# **ROCKYTAN RR7**

**APPLICATIONS & REMARKS** 

**Rockytan RR7** imparts the leather a very good filling. **Rockytan RR7** improves the buffing and embossing properties and gives a favorable response to finishing. The consumption rate varies with the type of leather and is about 2-4% (based on the shaved weight) after neutralization and dyeing.

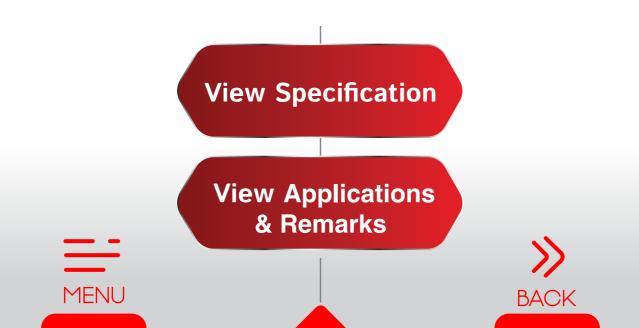

**Rockytan RHMN** is a retanning agent, based on amino resins, for the retanning of all types of chrome leathers.

**Rockytan RHMN** brings an increase in leather fullness, especially for the looser structured areas of the hide.

**Rockytan RHMN** improves the grain tightness, encourages the buffing and printing properties and improves the dye leveling.

### **ROCKYTAN RHMN**

Appearance	Beige powder
Nature	Amino resin
Solid Content, %	Min 97
pH (1:10 Solution)	8-9
Solubility	Non-soluble
Density (gr/cm3)	0.6 – 0.7
Packing	25 Kg's PE Bags
Shelf life	24 months

### TANNING & RETANNING AGENT

## **ROCKYTAN RHMN**

**APPLICATIONS & REMARKS** 

In retanning process, between 3 and 6 % of **Rockytan RHMN**, based on the shaved weight, it is recommended.

**Rockytan RHMN** is not stable under pH 4.0. Therefore, **Rockytan RHMN** should be applied after the neutralization stage.

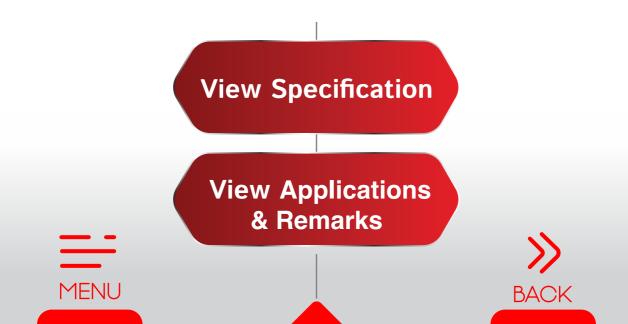

### **ROCKYTAN NLB**

**Rockytan NLB** is a synthetic retanning agent which is based on copolymer of melamine and sulphited phenol. It is suitable to be used in retanning process before and after fatliquoring.

### **ROCKYTAN NLB**

Appearance	White powder
Nature	Melamine & Phenol Copolymer
pH (1:10 Solution)	5 <u>+</u> 0.5
Solubility	Soluble
Density (gr/cm3)	0.5 – 0.6
Packing	25 Kg's PE Bags
Shelf life	24 months

## **ROCKYTAN NLB**

**APPLICATIONS & REMARKS** 

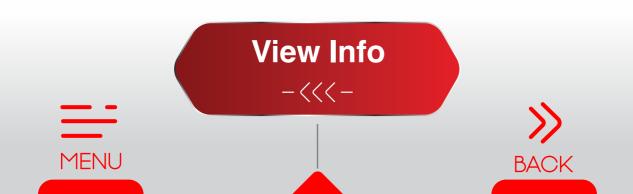

- Proper for both hides and skins.
- High light resistance.
- No effect on color shades in drum.

▶ Finished leather is completely soft with good feeling touch.

▶ It can be used before and after fatliquoring in tanning and retanning phase.

▶ We recommend that Rockytan NLB be used in white crusts or even in other light color crusts and dark color, because it does not make any problem in the different types of the color shades.

▶ Tanners could avoid all the problems by adjusting pH carefully in order to produce a high-quality finished leather.

## **ROCKYTAN ROS**

**Rockytan ROS** is a general-purpose replacement syntan for the retanning of chrome leather containing formaldehyde and vegetable tannage.

## **ROCKYTAN ROS**

#### SPECIFICATION

Appearance	White powder
Nature	Phenolic Replacement Syntan
Ionity	Anionic
Solid Content, %	Min 97
pH (1:10 Solution)	2-3
Solubility	Soluble into water
Density (gr/cm3)	0.5-0.6
Packing	25 Kg's PE Bags
Shelf life	24 months

**View Info** 

-<<<-

BACK

MENU

# **ROCKYTAN ROS**

**APPLICATIONS & REMARKS** 

**Rockytan ROS** can be diluted with both cold and warm water. It is suitable for all types of leathers.

**Rockytan ROS** gives almost a white leather with a medium firm handle. As it has low astringency, the fine pattern of the grains is preserved.

**Rockytan ROS** imparts a soft handle to the leather and along with the vegetable tannings, it brightens the color of leather. It also has a great levelling effect on dyes.

## **ROCKYTAN RAB**

**Rockytan RAB** is a phenolic condensation product, which can be used in any white and soft leathers. It also imparts them a good fullness and light-fastness.

## **ROCKYTAN RAB**

Appearance	White powder
Nature	Phenol Condensation
pH (1:10 Solution)	2-3
Solubility	Soluble into water
Density (gr/cm3)	0.4 – 0.5
Packing	25 Kg's PE Bags
Shelf life	24 months

# **ROCKYTAN RAB**

**APPLICATIONS & REMARKS** 

**Rockytan RAB** is suitable for all kinds of leathers, and to ensure that the good lightfastness can be achieved by this product, it is necessary to make sure that the other used chemicals such as syntans and fatliquors are lightfastness as well. The dosage of consumption is 2-4% (based on the wet blue shaved weight).

## **ROCKYTAN RP2**

**Rockytan RP2** is a weakly acid, naphthalene based synthetic retanning agent which can be used in any type of leather.

## **ROCKYTAN RP2**

#### **SPECIFICATION**

Appearance	Beige powder
Nature	Naphthalene Based Synthetic
Ionity	Anionic
Solid Content, %	Min 97
pH (1:10 Solution)	3.5
Solubility	Soluble into water
Density (gr/cm3)	0.5 – 0.6
Packing	25 Kg's PE Bags
Shelf life	24 months

**View Info** 

-<<<-

MENU

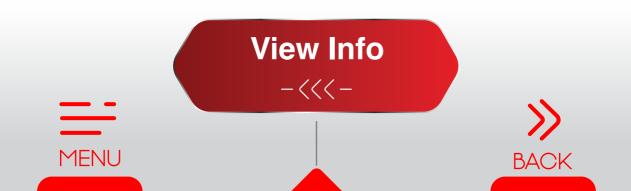

### TANNING & RETANNING AGENT ROCKYTAN RP2

**APPLICATIONS & REMARKS** 

If **Rockytan RP2** being used with Rockytan RR7 or vegetable tanning agents, it will make a bleaching effect on dye. It is recommended to be used alone or in combination with other chemicals for white crusts.

**Rockytan RP2** can be used in neutralization with other neutralizing agents like sodium formate and bicarbonate to decrease the superficial deposition of retanning materials. The consumption rate varies with the type of leather and is about 1-7% (based on the shaved weight) after neutralization and dyeing.

**Rockytan RP2** also makes great dispersing impact on dyestuffs, amino resins and replacement syntans.

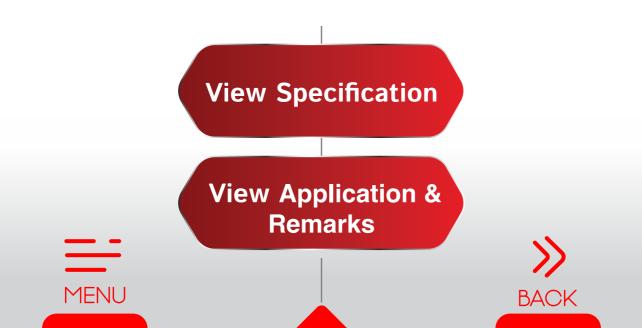

# **ROCKYTAN RD**

**Rockytan RD** has strong filling properties and also levels out fullness differences in the various parts of hide.

**Rockytan RD** has a positive effect on grain tightness. And fine milling pattern can be obtained by using this product.

## **ROCKYTAN RD**

Appearance	Off-white powder
Nature	Melamine condensation
pH (1:10 Solution)	7-8
Solubility	Soluble into water
Density (gr/cm3)	0.5 – 0.6
Packing	25 Kg's PE Bags
Shelf life	24 months

# **ROCKYTAN RD**

**APPLICATIONS & REMARKS** 

**Rockytan RD** improves fluffing, appearance, therefore suitable to be employed to treat Nubuck and velvet leathers.

**Rockytan RD** is easily soluble in hot and cold water and will be produced. a limpid slightly alkaline solution. Its stability cannot be guaranteed in pH lower than 3. Therefore, it is recommended to employ it only after neutralization. Retanning of Cowhide wet blue/shoe upper leather.

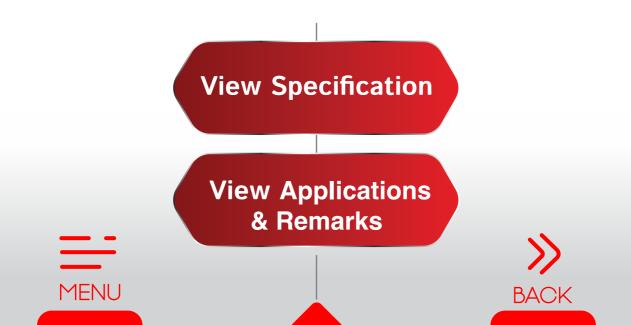

## **ROCKYTAN RPAK**

**Rockytan RPAK** is a lightfastness, anionic retanning material in powder form with a pronounced neutralizing and buffering effect and excellent dyeing properties.

### **ROCKYTAN RPAK**

#### **SPECIFICATION**

Appearance	Beige powder
Nature	Organic & inorganic compounds
Ionity	Anionic
Solid Content, %	Min 97
pH (1:10 Solution)	6.5 <u>+</u> 0.5
Solubility	Soluble into water
Density (gr/cm3)	0.65 ± 0.5
Packing	25 Kg's PE Bags
Shelf life	24 months

**View Info**

BACK

MENU

## **ROCKYTAN RPAK**

**APPLICATIONS & REMARKS** 

**Rockytan RPAK** has very good neutralizing capacity. It has excellent lightfastness.

**Rockytan RPAK** can be used single in neutralization process. It is used as neutralizing tanning and retanning materials for Aniline, Nubuck, Suede and other types of leather, where full colors, brilliance, levelness, lightfastnessand heat resistance are desired. Its better application occurs, when it's used between Sodium formate and bicarbonate about 1.5 - 2% for 45-60 minutes.

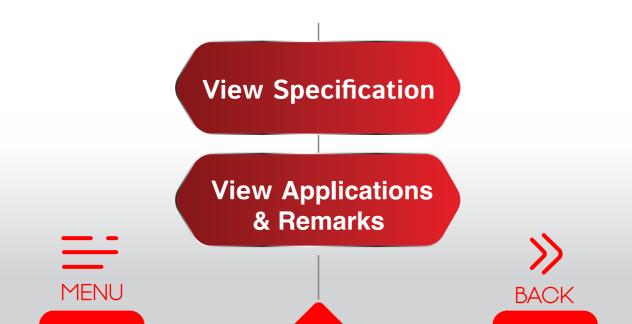

## **ROCKYTAN RE-808**

**Rockytan RE-808** is an acrylic retanning agent for full chrome leathers. It is compatible with synthetic and vegetable tanning agents, fatliquors, anionic dyes and other products.

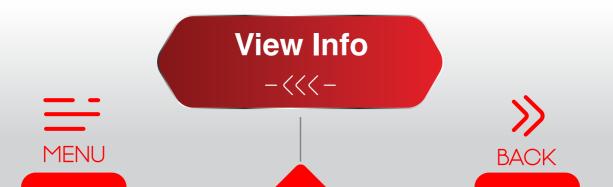

200

### **ROCKYTAN RE-808**

Appearance	Colorless Viscose Liquid
Nature	Acrylic
pH (1:10 Solution)	6 - 7
Solubility	Soluble into water
Viscosity cp@ 25 ℃	700-1000
Packing	PE Drums
Shelf life	12 months

### **ROCKYTAN RE-808**

**APPLICATIONS & REMARKS** 

**Rockytan RE-808** is applied with other types of Rockytans to obtain full and soft leather.

**Rockytan RE-808** acts as a very good filling agent for flanks of the skins or hides. Before retannage, the leathers must be neutralized well. In the case of vacuum drying, small dosage of this product at the top, makes the grains very fine and glossy and fixes the other chemicals. The dosage of consumption depends on the type of the leather and varies between 2-8% (based on the shaved weight).

## **ROCKYTAN RE-600**

**Rockytan RE-600** is a copolymer retanning agent based on acrylic monomers. It plays a very important role in filling of the loose bellies.

**Rockytan RE-600** helps to improve buffing characteristic on suede leathers as well.

### **ROCKYTAN RE-600**

Appearance	Clear yellow liquid
Nature	Acrylic
pH (1:10 Solution)	7.8 – 8.2
Solubility	Soluble into water
Viscosity cP @ 23 °C	2000 <u>+</u> 300 cp
Density (gr/cm3) 23 °C	1.250 - 1.300
Packing	PE Drums
Shelf life	12 months

## **ROCKYTAN RE-600**

**APPLICATIONS & REMARKS** 

Rockytan RE-600 makes leather, very soft and fulfill.

**Rockytan RE-600** is a very good retanning agent for all types of leathers. it also has a great lightfastness property in white crusts. It is notable that before retannage, the leathers must be neutralized well.

The dosage of consumption depends on the type of leather and varies between 2-8% (based on the shaved weight).

## **ROCKYTAN RAL**

**Rockytan RAL** is an aluminum tanning agent which can be used for all types of leather.

## **ROCKYTAN RAL**

Appearance	White powder
Nature	Pure crystallized aluminum tri- formate
pH (1:10 Solution)	3.5 <u>+</u> 0.5
Solubility	Soluble in both cold and warm water
Density (gr/cm3)	0.45 – 0.55
Packing	25 Kg's PE Bags
Shelf life	24 months

# **ROCKYTAN RAL**

**APPLICATIONS & REMARKS** 

**Rockytan RAL** can be used in production of white leathers, fixing dyestuffs and increasing dyeing brilliance. It also improves nubuck and suede due to good buffability.

**Rockytan RAL** is compatible with mineral tanning agents. It also has limited compatibility with anionic tanning agents and dyestuffs.

**If Rockytan RAL** being used along with chrome tanning agents in the main tannery stage, the produced leather will have a very light color and a very fine flat grain.

▶ In the retanning based on the shaved weight:

#### 1-3 % Rockytan RAL

► For increasing the color shade after the fixing with acid:

#### 0.3-1 % Rockytan RAL

▶ For fixation of hydrophobic agents:

#### 2-3 % Rockytan RAL

## FORMINAT L -191

**Forminat L -191** is a particular suited neutralizing agent for chrome processing.

## FORMINAT L -191

Appearance	Off-White powder
Nature	Sodium salt of organic chemicals
pH (1:10 Solution)	8.0 - 8.8
Solubility	Soluble into water
Density (gr/cm3)	0.8
Packing	25 Kg's Bags
Shelf life	24 months

## FORMINAT L -191

**APPLICATIONS & REMARKS** 

**Forminat L -191** is specifically made for leather processing, which is substituted of Sodium formate with desired result for leather industry.

# FATLIQUOR SELECT THE DESIRED PRODUCT:

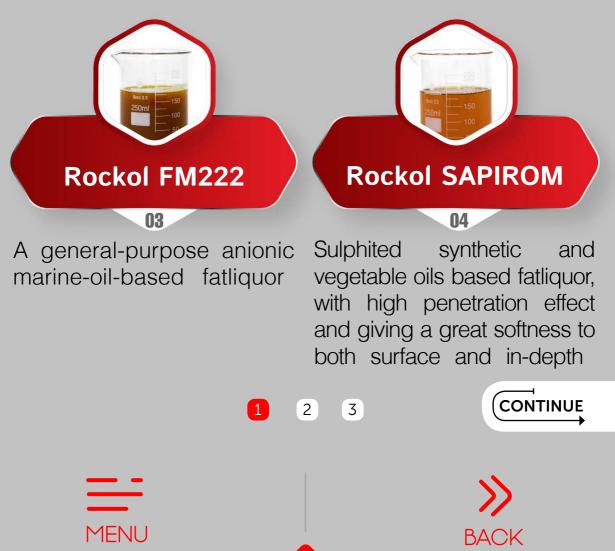

An anionic fatliquor, based on sulphited vegetable and synthetic oils which gives a good fulness, softness and weight to leather

01

#### **Rockol ATLAS**

02

A universal fatliquor, based on sulphited vegetable oils with great softness and smoothness, wich can be used in all types of light leather

# FATLIQUOR SELECT THE DESIRED PRODUCT:

A fatliquor, based on sulphited synthetic and natural oils with high fastness and softness to the grain

Lecithin along with sulphited marine oil based fatliquor, which gives softness, weight, fulness and very good touch on light and heavy leathers. Rockol CS-414

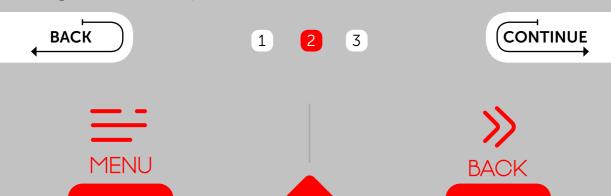

06

A synthetic fatliquor, which has high penetration and solubility plus uniform dispersion and moderate to high softness effect

A supplementary fatliquor to help emulsification and penetration of other oils in waters with high hardness

08

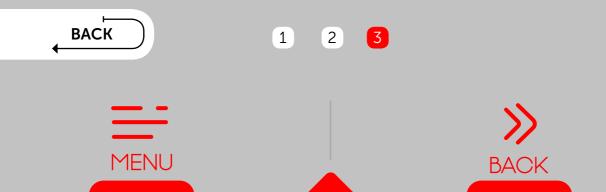

# FATLIQUOR SELECT THE DESIRED PRODUCT:

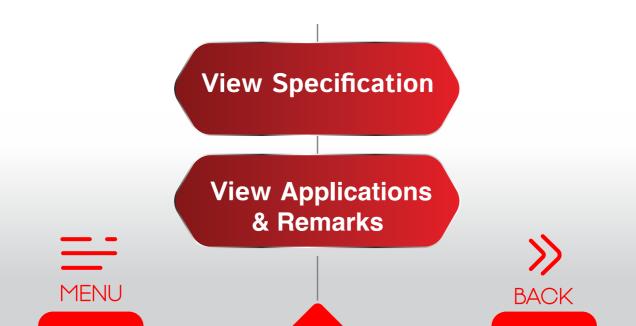

Sperm marine sulphited oil based fatliquor, which gives softness, weight, fulness and very good touch on light and heavy leathers.

**Rockol RSL** is an anionic sulphited natural and vegetable leather fatliquor, which is suitable for making soft leather gloves, suedes and also nubuck.

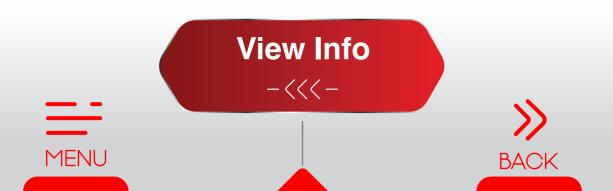

# **ROCKOL RSL**

Appearance	Clear Red wine Liquid
Nature	Sulphited Natural and Vegetable Oils
Solid Content, %	80-82
pH (1:10 Solution)	6 – 6.5
Solubility	Soluble into water
Packing	PE Drums
Shelf life	12 months

# **ROCKOL RSL**

#### **APPLICATIONS & REMARKS**

- It gives fullness to leather
- It increases the strength tear
- It gives mellow handling, softy velvet Touch

**View Info** 

-<<<-

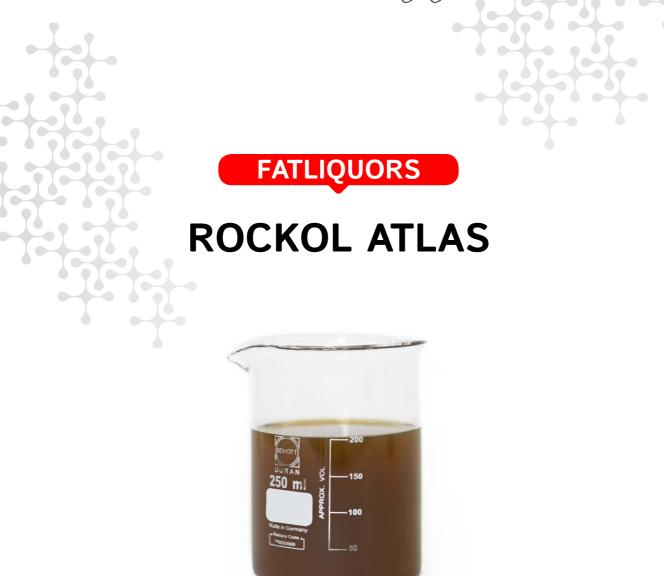

BACK

- It is sustainable against electrolytes
- It does not effect on dyeing shade
- It can be used alone (except crusts)
- Chrome Tanning Stage
- Main Fatliquoring Stage
- Sheep Nappa: 8%
- Goat gloves: 10%
- Goat lining: 4-5%

MENU

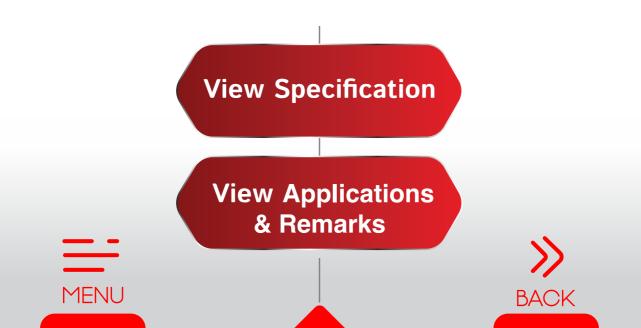

Cow upper (softy): 7%

**Rockol ATLAS** is a universal fatliquor based on sulfonated natural oils which can be used in all types of hides and skins.

It gives a great softness to the leather and fills it at the same time and as a result the smoothness could be felt.

# **ROCKOL ATLAS**

Appearance	Dark Brown viscose Liquid
Nature	Sulfonated natural oil
Solid Content, %	49 – 51
pH (1:10 Solution)	5.5 – 6.5
Solubility	Soluble into water
Packing	PE Drums
Shelf life	12 months

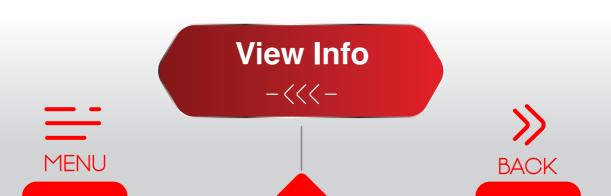

# **ROCKOL ATLAS**

**APPLICATIONS & REMARKS** 

**Rockol ATLAS** can be used for the processing of all types of hides and skins.

**Rockol ATLAS** is used for leather shoe uppers, garments and gloves in the main fatliquoring step, alone or along with other fatliquors to obtain higher softness in crusts.

# **ROCKOL FM-222**

**Rockol FM-222** is a general-purpose anionic marine-oil-based fatliquor having high fat content and suitable for all kinds of leather.

### **ROCKOL FM-222**

Appearance	Brownish clear liquid
Nature	Sulphited odorless marine oil
pH (1:10 Solution)	6.5 <u>+</u> 1
Solubility	Soluble
Packing	PE Drums
Shelf life	12 months

## **ROCKOL FM-222**

**APPLICATIONS & REMARKS** 

Due to its excellent softening properties, **Rockol FM-222** can be used on a wide range of leathers like lining, upper, upholstery, nappa, gloves, clothing and etc. **Rockol FM-222** can be added during chrome tanning, either before or after the addition of chrome powder. The consumption rate of the product depends on the type of the leather and is 2-4% (based on the shaved weight) and 0.3-0.5 based on the pelt weight in chrome tanning process.

#### Stability

Acetic Acid Formic Acid Sulphuric Acid Sodium Bicarbonate Ammonia Sodium Chloride Chromium Salt

MENU

Excellent Excellent Good Excellent Excellent Good

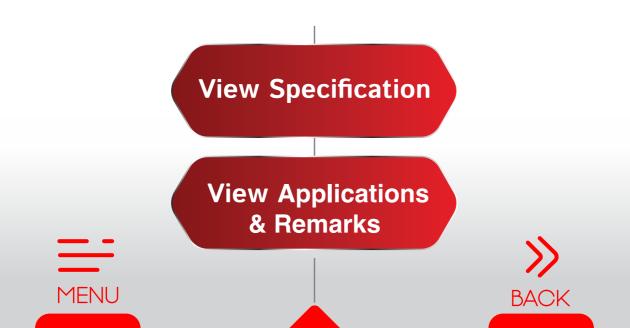

### **ROCKOL SAPIROM**

**Rockol SAPIROM** is a synthetic & vegetable based sulphited fatliquor which can be used single, or as a combination consisting of other fatliquors in any types of leather manufacturing.

### **ROCKOL SAPIROM**

Appearance	Clear light orange liquid	
Nature	Condensation of synthetic and vegetable oils	
Solid Content, %	59-63	
pH (1:10 Solution)	5 – 6.5	
Solubility	Soluble in any ratio for both cold & hot water	
Packing	PE Drums	
Shelf life	12 months	

### FATLIQUORS

### **ROCKOL SAPIROM**

**APPLICATIONS & REMARKS** 

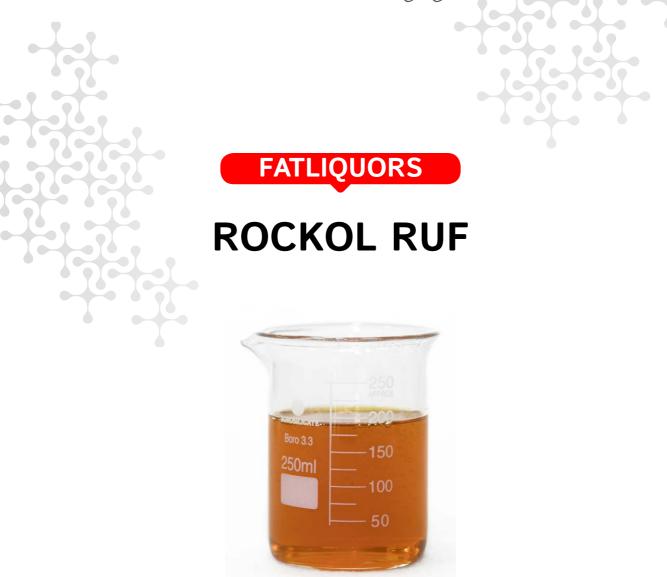

**Rockol SAPIROM** has a great softening effect and gives the leather natural weight.

**Rockol SAPIROM** can be used alone for garments and upholstery up to 18%. It works strongly in Acidic situation and it is odorless. It can be used with different type of waters easily.

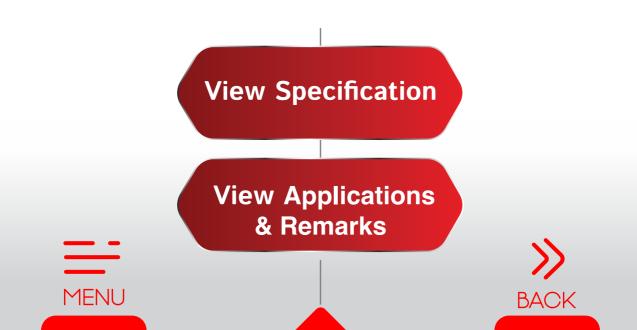

**Rockol SAPIROM** can be used in pickling stage & Wet blue process. It can be used for all type of leathers alone or with other fatliquors.

**Rockol RUF** is an anionic lightfast fatliquor used in garment and other soft leather manufacturing. It is a heat-resistant product and stable in chrome tanning floats.

### **ROCKOL RUF**

Appearance	Clear Yellowish-Brown Liquid
Nature	Sulphated and Sulphonated Natural and Synthetic Oil
Solid Content, %	56-58
pH (1:10 Solution)	6-7
Solubility	Soluble into water
Packing	PE Drums
Shelf life	12 months

## **ROCKOL RUF**

#### **APPLICATIONS & REMARKS**

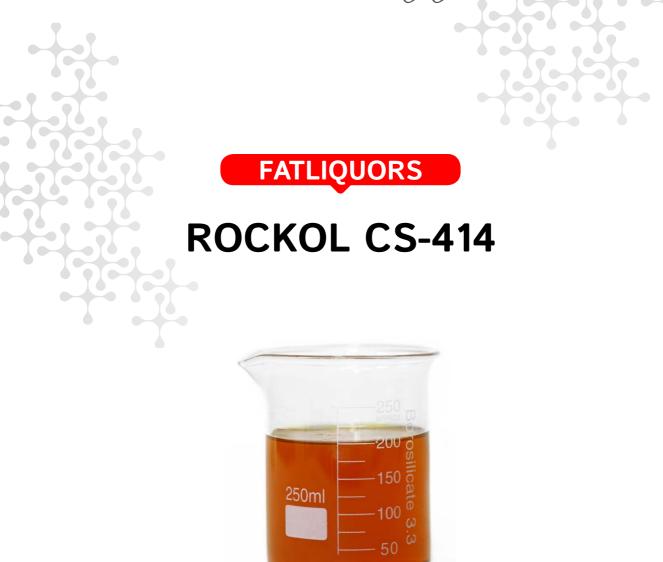

- It gives fullness to leather.
- It increases the tear resistance.
- It gives mellow handling and softy velvet touch.
- It is sustainable against electrolytes.
- It does not affect dyeing shade.

#### Main Fatliquoring Stage

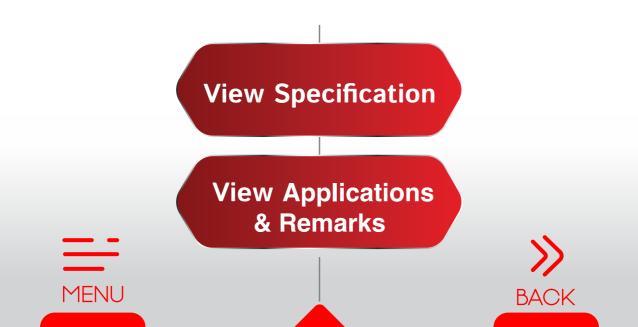

- Sheep Nappa: 8%
- Goat gloves: 10%
- Goat lining: 4-5%
- Cow upper (softy): 7%

**Rockol CS-414** is a lightfast synthetic fatliquor, which is based on a synthetic fatty alcohol and derivatives, and has been developed as a replacement of sulphonated sperm oil.

### **ROCKOL CS-414**

Appearance	Brownish clear liquid
Nature	Synthetic fatty ester
Solid Content, %	56-58
pH (1:10 Solution)	6.5 - 7.5
Solubility	Soluble into water
Packing	PE Drums
Shelf life	12 months

# **ROCKOL CS-414**

**APPLICATIONS & REMARKS** 

**Rockol CS-414** has a very good softening effect and imparts a very soft mellow handle.

The dosage varies with the type of leather and is 2 up to 10% (based on shaved weight in retanning)

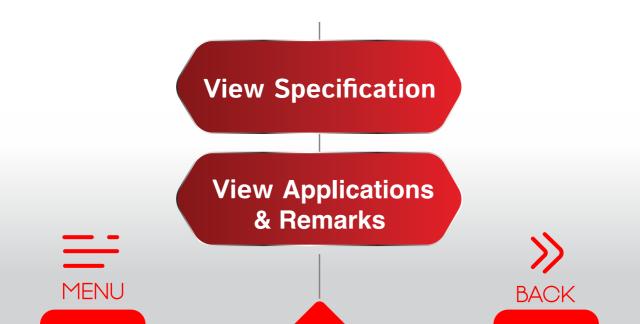

## **ROCKOL LNE-918 PLUS**

**Rockol LNE-918 Plus** is a high concentrated Lecithin and sulphited vegetable oil. It can be used for both light and heavy leathers. It gives smooth, soft, and silky touch for nappa, upper shoe, and full grain leathers. It is very good for garment and light weight leather.

### **ROCKOL LNE-918 PLUS**

#### **SPECIFICATION**

Appearance	Clear Brownish viscose liquid	
Nature	Lecithin and sulfited vegetable oils and emulsifiers	
Activity %	80	
Solid Content, %	75 <u>+</u> 1	
pH (1:10 Solution)	7 <u>+</u> 0.5	
Solubility	Soluble into water	
Melting point	5 °C

# LACQUER SELECT THE DESIRED PRODUCT:

A double - purpose nitrocellulose lacquer

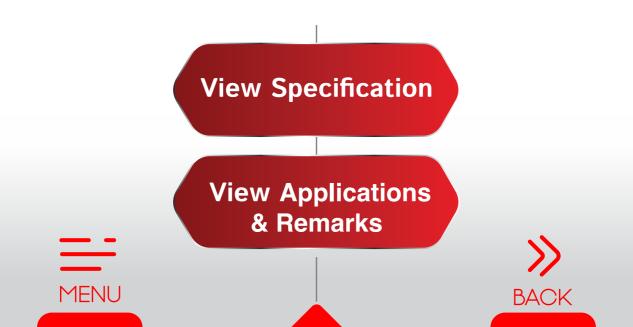

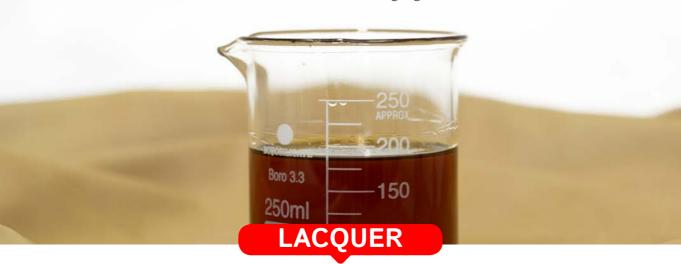

# **ROCKLACQUER EMC-99 (100%)**

a Hydro- nitrocellulose lacquer which can be diluted with solvent and can be applied by spraying on all types of leather.

## **ROCKLACQUER EMC-99 (100%)**

Appearance	Yellow Liquid
Nature	Nitrocellulose Resin
Activity, %	100
pH (1:10 Solution)	4-5
Packing	35, 100 & 200 kg's PE Drums
Shelf life	12 month

# **ROCKLACQUER EMC-99 (100%)**

**APPLICATIONS & REMARKS** 

**Rocklacquer EMC-99 (100%)** is mainly used for top coating to impart an attractive natural gloss and good wet and dry rub fastness to the leather.

**Rocklacquer EMC-99 (100%)** is recommended as a top coat fixing agent for all types of resin finishes.

**Rocklacquer EMC-99 (100%)** is water miscible lacquer and can be applied with spraying methods.

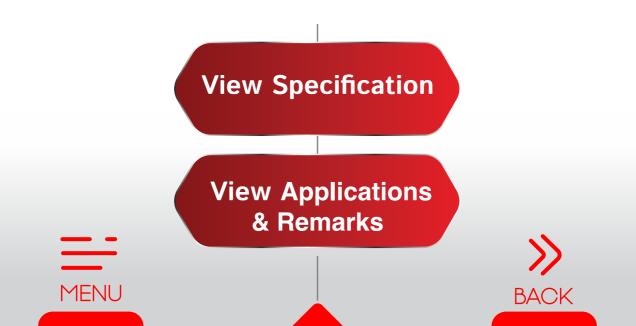

## **ROCKLACQUER EMC-99 (50%)**

**Rocklacquer EMC-99 (50%)** is a nitrocellulose emulsion lacquer which can be diluted with water and solvent and be applied by spraying on all types of leather.

## **ROCKLACQUER EMC-99 (50%)**

Appearance	Milky Liquid
Nature	Nitrocellulose Resin Emulsion
Activity, %	50
pH (1:10 Solution)	7-8
Solubility	Miscible with Water in any ratio
Packing	35, 100 & 200 kg's PE Drums
Shelf life	12 months

# **ROCKLACQUER EMC-99 (50%)**

### **APPLICATIONS & REMARKS**

**Rocklacquer EMC-99 (50%)** is mainly used for top coating to impart an attractive natural gloss and good wet and dry rub fastness to the leather.

**Rocklacquer EMC-99 (50%)** is recommended as a top coat fixing agent for all types of resin finishes.

**Rocklacquer EMC-99 (50%)** is water soluble lacquer and can be applied with spraying methods. Finished leathers with solvent thinner are more shining and brighter. The wet-rub fastness of them is also great.

# WAX SELECT THE DESIRED PRODUCT:

A flowable polyethylene and carnuba wax emulsion, with strong thermal resistance, causes to decrease adhesion on press and a thin and flexible film

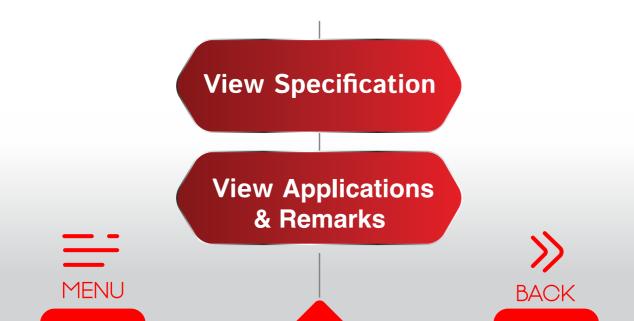

WAX

**Rockawax Montra-plus** is used in water finishes to improve the fullness, touch and smoothness of leather surfaces.

### **ROCKAWAX MONTRA-PLUS**

Appearance	White to cream flowable Liquid
Nature	Special Wax
Solid Content, %	20-21
pH (1:10 Solution)	7-8.5
Solubility	Soluble into water
Packing	35 & 50 Kg's PE Drums
Shelf life	12 months

## **ROCKAWAX MONTRA-PLUS**

#### **APPLICATIONS & REMARKS**

**Rockawax Montra-plus** improves the fullness, glazing and repolishing properties.

If **Rockawax Montra-plus** is used with emulsion lacquer, it makes finish with less glossy surface and smooth touch.

**Rockawax Montra-plus** is used in any finish where the excellent touch and feel required. If it is used in base coats, the filling will be improved, the absorption will be leveled and the amount of grain faults will be reduced. Due to the nature, it covers a wide range of temperature in polishing, plating and ironing.

**Rockawax Montra-plus** is compatible with other protein finishes to achieve a pleasant surface touch. **Rockawax Montra-plus** is suitable for upper, softy, nappa, glaze, garment and vegetable leathers.

Product Name	Description	Countertype
BEAMHOUSE
