Beamhouse

Degreasing Agent

Rapinal B is a powerful nonionic degreasing agent suitable for all kinds of hides and skins. It also can be used during the soaking, liming, deliming and bathing processes to accelerate them and giving cleaner, smoother and more uniform pelts.

Properties:

Appearance: Clear viscous liquid

Nature: Polyoxy ethylene oxide

Ionicity: Nonionic

PH(1:10 solution): 7 ± 0.5

Water Content %: Max. 0.5

Storage Conditions: Keep container tightly closed, storage period 12 months

Safety: According to our best experience, it hasn't any harmful effect on health.

Rapinal B

Applications & Recommendation

Rapinal B has outstanding emulsifying and power for fats, fatty acids and dirt of all kinds. It brings about more even distribution of fats and facilitates penetration of the chemicals. It can be used in alkaline and acid PH range. It dissolves equally well and quickly in both cold and warm water.

Rapinal B is free of alkyphenol (AP) and alkyphenol ethoxylates (APEO) and readily biodegradable.

Rapinal B liquid may precipitate if used with vegetable and synthetic replacement syntans. Separate baths should therefore be used when working with such products.

Our recommendation for use :

Degreasing:

Sheep pelts: 3-4% (based on weight) without using of solvent

Sheep pickel: 2.5-3% (based on pickel weight) without using of solvent

In soaking, deliming and bathing : 0.3 - 0.5%

If solvent is used together with the Rapinal B for degreasing, the dosage of consumption of Rapinal B can decreased up to 40%.

NOTE: According to our best knowledge and technical experiments, the above data is true and accurate. Regarding to variety of consumption procedures, it is recommended to evaluate the information before use.
