
Technical information

Textile Chemical

Emulsifiers

Rockapon QW 100% is a mercerizing and caustic wetting agent for cotton and cotton/polyester yarns.

Properties:

Appearance: Yellow liquid

Nature: Sulphated alcohol

Ionity: Anionic (free of salicylic acids)

Stability: Resistant to caustic soda at all concentrations

Safety: According to our best experience, it hasn't any harmful effect on health.

Packing: ??

Rockapon QW-100%

Applications & Recommendation

Rockapon QW 100% is an odorless (faintly aromatic odors) and low foaming mercerizing and caustic wetting agent which can be used in mercerizing lies of up to 32 Be'.

Rockapon QW 100% is an effective wetting agent in caustic soda from 25-30 Be'. Thus if possible, a caustic soda concentration should not be exceeded from Be'=32. Due to the excellent wetting properties of Rockapon QW 100% on yarns and piece goods, a rapid penetration of the mercerizing lye is achieved, often previous scouring or kier-boiling unnecessary. This product has following advantages: reduced wear on the goods, improved feel, saving of working time and steam, reduction of scouring losses.

NOTE: According to our best knowledge and technical experiments, the above data is true and accurate. Regarding to variety of consumption procedures, it is recommended to evaluate the information before use.
